Overview

Adding images to a page

Multiple sources

Using images in your page

```

```

Including Images in a Page

src – where can the image file be found

alt – text to display or read in place of the image

height / width – control display sizing

```

```

Alternate Image Sizes

Provide different sizes of the same image

Set viewport relative sizes based on the media query

```
<picture  
  <source type="image/jpeg" srcset="" sizes="" />  
  <source type="image/png" srcset="" sizes="" />  
  <img src="" alt="" />  
>
```

Using Picture to Select Images

Select images based on media queries

Select images based on supported image formats

Using Images in Your Pages
